High Insulated Plastic Bulk Container type 300 / 20156

Product description

Type 300 Plastic Bulk Container is used in the meat industry for storage of meat and chilled products and is convenient where space is restricted. Type 300 Plastic Bulk Containers conform to the ISO 6780 international transportation standard in all respects and is accessible by a hand pallet jack and a forklift truck from all four sides and can be rotated 180° by forklift truck or lifting tipper and lifted with straps. Filled with water, type 300 High Insulated Plastic Bulk Containers in good condition, can be stacked up to four containers high. It is available with one or two 50 mm outlets or without outlets. The Borgarplast containers can last about 6-8 years with regular maintenance and if damages are repaired immediately.

Type 300 Plastic Bulk Container is designed for the food industry, including the meat industry. It is used by butchers, caterers, food service, grocery whole sale, food processing, industrial applications, logistic applications, cheese production, pet food production and transport and high capacity food storage. It is suitable for transport storage and food distribution such as meat, pharmaceuticals, dairy products, grocery, ice cream, dry and slush ice, perishables, fruits, pickling and salted meat.

High Insulated Plastic Bulk Container type 460 / 20159

Product description

Type 460 Plastic Bulk Container is increasingly popular among quality food producers because of their shallow design. It is 150 mm lower than the 660 version, which reduces pressure on the content. It is accessible by a hand pallet jack from two sides and by a fork lift truck from all four sides and can be rotated 180° by forklift truck or lifting tipper and lifted with strops. Types 460 and 660 are stackable on the top of each other either with lid or without it. The Borgarplast containers can last about 6-8 years with regular maintenance and if damages are repaired immediately.

Type 460 Plastic Bulk Container is designed for the food industry, including the meat industry. It is used by butchers, caterers, food service, grocery whole sale, food processing, industrial applications, logistic applications, cheese production, pet food production and transport and high capacity food storage. It is suitable for transport storage and food distribution such as meat, pharmaceuticals, dairy products, grocery, ice cream, dry and slush ice, perishables, fruits, pickling and salted meat.

Plastic Collection Container types 400, 460, 600, 660, 460E and 660E

Product description

These containers have been used for collecting liver (for melting), dead fish (salmon), dead chicken as well as waste from slaughterhouses and fish processing plants. Users also include pet food producers among others. The containers most commonly used for these purposes are types 400, 460, 600, 660, 460E and 660E.

These containers are completely water- and airtight. The lids, fitted with the upper part of a herring barrel (including lid), are welded to the containers. The container is filled through the herring barrel opening and emptied by 180° rotation of the container by a fork lift truck.

Lids

Product description

High insulated lids are available for all Borgarplast containers. The lids are insulated with Polyurethane (PUR). The lids are fastened with the containers with strong rubber straps, which are resistant to ultraviolet light (UV), but are not considered fully watertight. Completely filled containers with lids are stackable on top of each other.

Compaction lock / 20300

Product description

Compaction lock are used for keeping the product beneath the surface of liquid in the container, e.g. during salting or pickling. Compaction locks fit into containers types 400, 460, 600 and 660.

Rubber straps replacement sizes 300 and 350 / 95522

Product description

Replacement item.

Strong rubber straps used to fasten the lids to the container. Resistant to ultraviolet light (UV).

For Borgarplast lids types 300 and 350.

Rubber straps replacement sizes 400-1400 / 95523

Product description

Replacement item.

Strong rubber strap used to fasten the lids to the container. Resistant to ultraviolet light (UV).

For Borgarplast lids sizes 400, 450, 460, 600, 660, 700, 1000, 1010 and 1400.

Plastic Plug for Containers / 95511

Product description

Plastic Plug that fits all the Borgarplast containers.

Plastic Plug with a 3/4 hole / 95512

Product description

Plastic Plug that fits all of Borgarplast containers. It has a 3/4" hole which can be used for example to connect a hose or a 3/4" Tap (no. 95520).

Plastic Tap 3/4 / 95520

Product description

3/4" Plastic Tap that can be fitted to a Plastic Plug (no. 95512).

Key for plastic plugs / 95525

Product description

Key to loosen or tighten the plastic plugs.

ID Containers and Pallets

Product description

RF (radio frequency) ID containers and ID pallets have embedded microchips, which are either programmable or have fixed serial numbers. Data in ID containers and ID pallets can be read into computers using hand scanners or scanners installed in forklifts or conveyor belts. A wide selection of software is available for managing the entire production process using ID containers and ID pallets at all stages from the slaughterhouses to value added processing. ID containers and ID pallets offer enhanced security and automation of the production process.

Marking and Logos

Product description

If containers need to be marked, three main methods are employed:

1. Lettering is milled into one or two sides of the container, representing a name abbreviation and/or number. The lettering is coloured with a felt-tip pen, which needs to be renewed at several months' intervals. This is a permanent form of labelling which can only be removed by scraping off a layer of the container. But scraping the letters off will also leave a permanent mark on the container. This is the most economical and simplest method.
2. Silk screen printing on one or two sides, lettering or logo. The option of one colour is offered. Running serial numbers must be milled. Silk screen can withstand washing with water if a very stiff brush is not used.
3. Mould-in graphics. Lettering and logo. The customer can choose from one, two or three colours. Running serial numbers must be milled. This is a more permanent method than silk screen, but more expensive, especially on a small scale.

Plastic Europallet with raised top face / 10100

Product description

Plastic Europallet, un-rimmed, with raised ribbed surface (non-skid).

This product conforms to the ISO 6780 transportation system standards. The capacity of the standard pallets (based on equal distribution of load) is 1.000 kg on a smooth plain. If the pallets are rested on their ends, for example between shelves, their capacity is reduced to 300 kg. Pallets with higher load capacity can be ordered and manufactured according to customer's specifications. It is easy to repair pallets using superheated air (250°C) and Polyethylene welding rod.

Size and measurements

External Length (mm)	External Width (mm)	External Height (mm)	Weight (kg)
1200	800	150	17

Plastic Europallet with internal rim / 10100KE

Product description

Plastic Europallet, moulded with a 22 mm internal rim and smooth surface. Drainage slits on the corners prevent water from accumulating on the surface.

This product conforms to the ISO 6780 transportation system standards. The capacity of the standard pallets (based on equal distribution of load) is 1.000 kg on a smooth plain. If the pallets are rested on their ends, for example between shelves, their capacity is reduced to 300 kg. Pallets with higher load capacity can be ordered and manufactured according to customer's specifications. It is easy to repair pallets using superheated air (250°C) and Polyethylene welding rod.

Size and measurements

External Length (mm)	External Width (mm)	External Height (mm)	Surface length inside rims (mm)	Surface width inside rims (mm)	Weight (kg)
1200	800	150	1170	770	18

Plastic Europallet external rim / 10100K

Product description

Plastic Europallet moulded with a 22 mm external rim and smooth surface. Drainage slits on the corners prevent water from accumulating on the surface.

This product conforms to the ISO 6780 transportation system standards. The capacity of the standard pallets (based on equal distribution of load) is 1.000 kg on a smooth plain. Plastic Box Pallet / 10103

Product description

Plastic Box pallet, moulded with a 22 mm internal rim, drainage slits on the corners and the middle of the sides to prevent water from accumulating on the surface. The Box pallet can be lifted with strops.

70 litre Plastic Bin / 15112

Product description

The 70-litre Plastic Bin is fitted with strong handles. The bins are stackable inside each other and easy to remove afterwards. The 70-litre Plastic Bin is used widely in food production and handling. It is made of Polyethylene (PE), which is approved for use within the food industry by the US FDA (US Food and Drug Administration) and comparable regulatory bodies in the European Union. Borgarplast has manufactured Plastic Bins since 1985.

Size and measurements

External Height (mm)	Top diameter (mm)	Bottom diameter (mm)	Max lenght incl. handles (mm)	Weight (kg)
415	535	425	625	6,1

80 litre Plastic Bin / 15114

Product description

The 80- litre Plastic Bin is fitted with strong handles. The bins are stackable inside each other and easy to remove afterwards. The 80-litre Plastic Bin is used widely in food production and handling. It is made of Polyethylene (PE), which is approved for use within the food industry by the US FDA (US Food and Drug Administration) and comparable regulatory bodies in the European Union. Borgarplast has manufactured Plastic Bins since 1985.

Size and measurements

External Height (mm)	Top diameter (mm)	Bottom diameter (mm)	Max lenght incl. handles (mm)	Weight (kg)
385	570	495	685	7,1

100 litre Plastic Bin / 15113

Product description

The 100-litre Plastic Bin is fitted with strong handles. The bins are stackable inside each other and easy to remove afterwards. The 100-litre Plastic Bin is used widely in food production and handling. It is made of Polyethylene (PE), which is approved for use within the food industry by the US FDA (US Food and Drug Administration) and comparable regulatory bodies in the European Union.
